## CHILD SAFETY

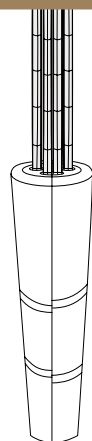

All corded blinds come with clear cord stop rings, breakaway tassel, and two-piece cleat.

Minimum cord length required is 300mm.

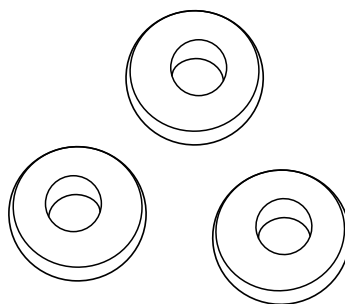

CHILD SAFETY TWO PIECE CLEAT - LC159

BREAKAWAY TASSEL - VC986

CORD STOP RINGS - VC902

## CONTROL LENGTHS AND INSTALLATION HEIGHTS

---

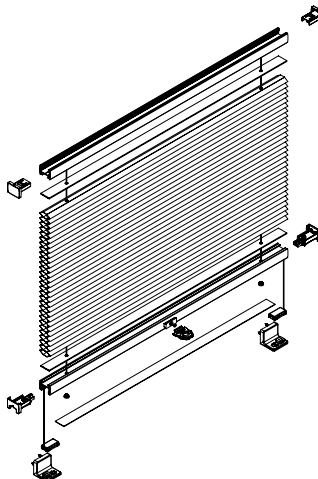

- › Standard control length is 2/3 of product height.
- › When control length does not meet the child safety requirements, then it needs to be reduced to the maximum allowed length according to those requirements.
- › When installation height is known, the distance between the floor and the bottom of the controls needs to be no less than 1.5m.
- › When installation height is unknown, but the blind height is less than 2.5m, control length should be no more than 1m.
- › When installation height is unknown, but the blind height is more than 2.5m, control length should not be longer than the blind height reduced by 1.5m (blind h - 1.5m=control length).

# SYSTEM TYPE

## FITtoFRAME™

# FITtoFRAME

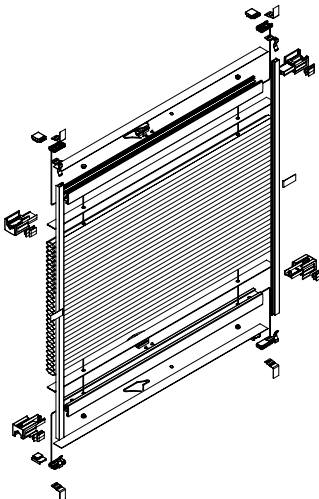

FITtoFRAME™ allows customers to mount blinds directly to windows, without the need for screws.

A tensioned Top Down, Bottom Up blind is used, guided by side rails.

\*On square frame windows, please ensure there is a minimum of 2mm rubber bead protruding onto the glass.

\*Not available with Bowery fabric.

# PERFECT FIT SYSTEM

## SIDE FRAMES

Two holes are punched into the side frames. Window fixing brackets attach the blind to the window. Anything over 1100mm drop there will be three holes punched.

## FIXING BRACKETS

Fixing brackets come along with the blind to fit the blind into the window space.

Window fixing brackets come in 9 sizes:  
18mm, 20mm, 22mm, 24mm, 26mm, 28mm, 30mm, 32mm, 38mm  
Colours available: White, Brown, Anthracite and Black.

## ATTACHING THE BRACKETS

You can use a credit/debit card as a template to find the correct position for the brackets.

Place the card length ways along the side of the window in each corner and line up the bracket with the end of the card.
